# PRESTIGIOUS PATIENT TRANSPORT

## **WHAT IS PRESTIGIOUS PATIENT TRANSPORT (PPT)?**

Our PPT service gives you, your relative or someone you know the ability to fulfil journeys that may not be possible without assistance. Our medically trained ambulance staff collect you or your relative from your location and take you to a place / location of your choice (examples to the right).

Our staff accompany you to ensure that all your needs are met. This means that you are able to receive care for the day, to do, see and go to places that otherwise wouldn't have been possible.

This opens up new opportunities for those with additional needs, who are unwell, elderly or vulnerable. Allowing them to spend further moments outside of their normal environment to experience, relive and make memories once more.

We provide you with onsite care across the day, as well as the transport services. We tick multiple boxes at once to increase the quality of life for individuals.

**If it's visiting a family party, getting to experience a favourite memory once more or spending time with someone who lives far away, we can help bring people, memories and emotions together.**

## **Previous examples are:**

- Our crew supported a 78 lady for the day who wanted to experience fish and chips at Whitby one last time, her family met her at the location and our staff managed her medical and transport needs.
- We arranged and facilitated an 81-year-old gentleman to visit Castleton in the Peak District once more in his lifetime.
- We took an 84-year-old lady to her great granddaughter's birthday party so that she could be with her whole family.

As an ambulance service, we bridge the gap between patient transport and supported care. All of our staff are kind, caring, friendly, down to earth and approachable. Our staff always allow patients to feel at home and respect all of their individual needs. We facilitate chances for people to experience the things they used to enjoy in life, still enjoy in life or want to experience again and didn't think they would be able to.
